

claude code

Here are 26 Claude Code shortcuts: (That most users don't know exist)

SESSION CONTROL

`/clear` - Wipes context and starts clean. `/rename [name]` - Renames the session. `/rewind` - Rolls back to an earlier checkpoint. `/resume [session]` - Reopens it by ID or name. Leave it blank and Claude auto-generates one. `/export [filename]` - Saves conversation as plain text. `/branch [name]` - Forks the conversation to a new path.

MODEL & USAGE

`/extra-usage` - Unlocks extended usage when limits hit. `/model [model]` - Switches to Sonnet, Opus, or Haiku. `/cost` - Shows token usage for the current session. `/usage` - Shows plan limits and rate-limit status.

PROJECT SETUP

`/init` - Builds a CLAUDE.md guide on first run. `/add-dir <path>` - Adds a directory for file access. `/config` - Opens settings for model, style, preferences. `/memory` - Edits CLAUDE.md and controls auto-memory.

CODE OPERATIONS

`/permissions` - Sets allow, ask, and deny rules per tool. `/diff` - Opens a diff viewer for uncommitted changes. `/security-review` - Scans changes for vulnerabilities. `/plan [description]` - Claude proposes before acting.

AGENT LAYER

`/agents` - Manages agent and sub-agent configurations. `/compact [instructions]` - Compresses the conversation. `/mcp` - Manages MCP server connections and OAuth. `/reload-plugins` - Reloads plugins without restarting. `/skills` - Lists all skills, built-in and custom. `/plugin` - Manages Claude Code plugins.

INTERFACE

`/theme` - Switches between light, dark, accessible. `/color [color]` - Sets prompt bar color for the session.

This is Claude Code, not Claude Chat or Cowork.
