Iphone CheatSheet

Force restart

To fully reboot an iPhone 15, follow these steps:

1. Press and release the Volume Up button quickly. 2. Press and release the Volume Down button quickly. 3. Press and hold the Side button (on the right side of the device) until the Apple logo appears on the screen. This might take a few seconds, so keep holding the button even if the power-off slider appears.

Once you see the Apple logo, release the Side button, and your iPhone will reboot fully

This process is also known as a “force restart” and doesn't delete your data.
