

My actual ~/.bashrc with:

- Alias
- Completions
- Functions
- Fun Prompt

You need:

- bash
- ccze

```
#
# ~/.bashrc
#

# If not running interactively, don't do anything
[[ $- != *i* ]] && return

# include the global system file
if [ -f /etc/bashrc ]; then
    . /etc/bashrc
fi

# Add some color schema
if [[ "$TERM" != "linux" && -f ~/.dircolors.256colors ]]; then
    eval $(dircolors ~/.dircolors.256colors)
elif [[ -f ~/.dircolors ]]; then
    eval $(dircolors ~/.dircolors)
fi

# Add some nice folder in the path
PATH=$PATH:~/bin
export PATH

# Default editor
export EDITOR=vim

# Bash options
shopt -s checkwinsize      # check the window size after each command and, if
                            # necessary, update the values of LINES and COLUMNS.
shopt -s cdspell           # autocorrects cd misspellings
shopt -s dotglob           # include dotfiles in pathname expansion
shopt -s autocd            # auto "cd" to a directory

# don't put duplicate lines and same successive entries in the history.
export HISTCONTROL=ignoreboth

# Colorized less command
