Something I like to do: getting notification of what's ringing on my phone to my laptop.
There is a solution for that: Linconnect! → https://github.com/hauckwill/linconnect-server

1. Installation
   You need the server (check your package manager for linconnect-server) and the client: https://play.google.com/store/apps/details?id=com.willhauck.linconnectclient
   You need libnotify to work on your desktop see: How to
2. Connection
   Launch the server

   ```
   linconnect-server
   ```

   On the Android device, follow the onscreen instruction, the device should discover by itself the server otherwise add it by hand.

Et voilà ! You can setup/filter which Application can send notifications
