1. Reset everything: if you have this kind of message:

```
error: key "A6234074498E9CEE" could not be looked up remotely
```

here's the Hiroshima™ ® © solution

```
# rm -R /etc/pacman.d/gnupg/
# rm -R /root/.gnupg/  # only if the directory exists
# gpg --refresh-keys
# pacman-key --init && pacman-key --populate
# pacman-key --refresh-keys
```

Reference: https://bbs.archlinux.org/viewtopic.php?id=193382

2. Reset a key: example repo-ck (as root)

```
pacman-key -r 5EE46C4C && pacman-key --lsign-key 5EE46C4C
```

Garuda

→ Garuda Assistant > Refresh Keyring

Archlinux

```
sudo pacman -Sy archlinux-keyring
sudo pacman-key --populate archlinux
sudo pacman-key --refresh-keys
sudo pacman -Syu
```

or

```
killall gpg-agent
rm -rf /etc/pacman.d/gnupg
pacman-key --init
pacman-key --populate archlinux
```
