the archive way

You can grab an already made archive:

```
cd /tmp
ftp http://ftp.openbsd.org/pub/OpenBSD/$(uname -r)/ports.tar.gz
ftp http://ftp.openbsd.org/pub/OpenBSD/$(uname -r)/SHA256.sig
signify -Cp /etc/signify/openbsd-$(uname -r | cut -c 1,3)-base.pub -x
SHA256.sig ports.tar.gz
su
cd /usr
tar xvzf /tmp/ports.tar.gz
```

And voila

the cvs way

You can also get the ports through cvs.

First time

The first time using:

```
cd /usr
cvs -qd anoncvs@anoncvs3.usa.openbsd.org:/cvs get -P ports
```

Grab a coffee 😎

Update

Then upgrade it with:

```
cd /usr/ports
cvs -q up -Pd
```
