Networking - defaults

You can configure networking per interface by editing /etc/hostname.XXX file where XXX is your interface name (em0/iwn0/...)
Example /etc/hostname.iwn0:

```
nwid YourNiceSSID
wpakey WPAkeyYouHave
dhcp
```

This will allow you to connect to the network YourNiceSSID simply by

```
sh /etc/netstart iwn0
```

Networkng - Manual

Example:

```
ifconfig iwn0 nwid "YourNiceSSID" wpakey "WPAkeyYouHave"
```

Is equivalent to the above /etc/hostname.iwn0 example
