Node6

32 CPU
256GB RAM
2TB

Install from ISO with IP :192.168.1.22/24

SSH

By default ssh is open for root account:

```
vi /etc/ssh/sshd_config
```

once key copied change to

```
#PermitRootLogin yes
PermitRootLogin prohibit-password
```

```
 service ssh restart
```

APT

change to no subscription:

```
vi /etc/apt/sources.list.d/pve-enterprise.list
```

```
#deb https://enterprise.proxmox.com/debian/pve bookworm pve-enterprise
deb http://download.proxmox.com/debian/pve bookworm pve-no-subscription
```

and

```
vi /etc/apt/sources.list.d/ceph.list
```

```
#deb https://enterprise.proxmox.com/debian/ceph-quincy bookworm enterprise
deb http://download.proxmox.com/debian/ceph-reef bookworm no-subscription
```

```
 apt update && apt full-upgrade -y
```

missing software

```
 apt install vim htop lsof
```

Network

Config in **/etc/network/interfaces** Interfaces were all screwed up, being eno1 or eth1 randomly @boot.

FIX ETHX

```
vi /etc/default/grub
```

```
GRUB_CMDLINE_LINUX="net.ifnames=0 biosdevname=0"
```

```
update-grub
```

And all interfaces are ethX
