

# Description

Thinkpad T495s  
256GB nVME/16GB RAM  
Partitions:

- Partition 1: 100MB boot (EFI)
- Partition 2: 119GB C:/ NTFS
- Partition 3: 20GB SHARE FAT
- Partition 4: 98GB Linux (BTRFS)
- Partition 5: 848MB Recovery crap

# Windows

## Base Shit

Install Windows 11 Pro, if 22H2, use Windows update then go to <https://www.microsoft.com/en-us/software-download/windows11> and Install the “Windows 11 Installation Assistant” which will require to install & run PC Health check ... even though there's

already Windows 11 installed 

## AtlasOS

Be up-to-date and connected to the power cord before running the Playbook  
→ <https://atlasos.net/>

## Debloat & nice software

Using Powershell (as administrator)

```
irm christitus.com/win | iex
```

## Keyboard

Switch to US international in Settings/Time & Language/Language & Region → United states [...]/language options and add the keyboard, remove the normal one.
